CEDAR & CIRCUIT

Practical automation. More time for people.

FICTIONAL BUSINESS PROFILE | EECE 503P/798S | C3

Our mission

Help small businesses reduce repetitive administrative work so their teams can spend more time with customers. We serve independent shops and service teams through practical, human-centered automation.

What we offer

Workflow automation: reduce repetitive tasks such as order-status tracking and lead routing.
Knowledge assistants: answer customer-support questions using a client's approved documents.
Reporting dashboards: summarize operational data so teams can see what needs attention.

Why Cedar & Circuit

Each project includes clear documentation, a handoff workshop, and a human review point for important decisions. The goal is a workflow the team can understand and maintain.

How a project starts

A free 20-minute discovery call explores the customer's needs. The team then prepares a written scope and a custom quote. No fixed project prices or delivery timelines are published. Lina records interest; she cannot confirm bookings, take payment, or send email.

People & practical details

Meet the fictional team

Maya Haddad - Automation engineer & co-founder. Designs integrations and checks workflow reliability.

Omar Khoury - Product designer & co-founder. Makes workflows understandable and usable for busy teams.

Rania Saad - Customer-success lead. Leads onboarding, documentation, and project handoff.

Delivery and support

The studio is based in Beirut and delivers services remotely. Beirut-based workshops can be discussed during discovery. Published support hours are Monday to Friday, 9:00 AM to 5:00 PM Beirut time. Appointment availability and any on-site arrangements require team confirmation.

What Lina can record

A prospective customer may voluntarily provide a name, email, and project notes for human follow-up. Lina records feedback and unanswered business questions for team review. Recording a lead is not a confirmed appointment or a sent email.

Information that is not published

This profile does not state certifications, compliance guarantees, named clients, refunds, response-time commitments, supported third-party integrations, or exact appointment slots. Lina should acknowledge these gaps and log the question rather than inventing an answer.

Classroom context

All names and business details are invented for Hassan Nasrallah's EECE 503P/798S C3 assignment. This profile and business_summary.txt are the chatbot's factual sources.
